

IMPACTIVA APPAREL QUALITY CONTROL PROGRAM

FROM REWORKS TO LOST SALES, POOR QUALITY CAN PUT YOUR GLOBAL SUPPLY CHAIN AT RISK

Poor quality and corruption destroy profits. Client chargebacks, lost sales and air freight can dramatically reduce your margins and damage your company's brand. There is considerable room for improvement, and at Impactiva, we can help. Our corruption-free, apparel specialized technicians will work with you to design, establish, and implement an Apparel Final Shipment Quality Control Program at your factories that increases efficiency and productivity while reducing your cost of poor quality by more than 90 percent.

WHY IS IMPACTIVA DIFFERENT?

TAILORED PROGRAM TO SATISFY YOUR OPERATING GOALS

Our approach is comprehensive and customized. Following initial meetings to understand the operating rules of your apparel supply chain, we'll develop a Processes and Procedures Book that governs how the final shipment quality control works. Then before each season begins, we'll work to create a spec sheet for each style with the key points of esthetic look, fit and functionality to be controlled. We also ensure that a pre-production sample approved by you exists at the factory at the moment of inspection. These steps are key pillars of our system, allowing us to reduce confusion and quickly improve the average outgoing quality of your product.

QUALITY INSPECTIONS AND CONTINUOUS IMPROVEMENT

Our Final Shipment Quality Control Inspection methodology entails leading-edge critical and important manual tests and measurements audits which are far superior to those performed by the industry. But that's not all. Once your apparel orders are shipped, we'll investigate the root cause of any claims and identify ways to prevent them in the future. By creating and maintaining a culture of learning and accountability, Impactiva will ensure continuous improvement throughout your supply chain.

INDUSTRY-LEADING APPAREL QUALITY CONTROL SPECIALISTS

Your highly trained Apparel Final Shipment Quality Control Team will include a wide array of corruption-free professionals, including technicians with formal education in apparel technology and a minimum of five years of industry experience. Our Team gives you the flexibility of fast deployment of quality control resources to suppliers across the globe while eliminating the stress, time, and cost of recruiting, training, coaching, and supervising your own quality control team.

Impactiva's Apparel Final Shipment Quality Control Program will ensure that **+98.0 percent** of your shipments arrive without factory claims, enhancing quality while cutting cost and frustration.
