

IMPACTIVA LABORATORY TESTING QUALITY ASSURANCE SERVICE

FROM RECALLS TO GOVERNMENT PENALTIES, POOR PRODUCT TESTING CAN HAVE SERIOUS FINANCIAL CONSEQUENCES

Restricted substances and material failures destroy profits. Delivery delays, cancelled orders, product recalls, reworks and damage to your brand: all can reduce margins and put your company at risk. You have a lot at stake, so why trust a massive, impersonal production lab with your product testing needs? At Impactiva, we do lab testing Right from the start™. In partnership with NSF International's state-of-the-art laboratory in Shanghai, we'll work with you to design a customized, end-to-end Laboratory Testing Quality Assurance Program that withstands the most demanding government scrutiny while minimizing costs and maximizing product safety and security.

WHY IS IMPACTIVA DIFFERENT?

CUSTOMIZED PROTOCOL TO SATISFY CUSTOMER NEEDS

Instead of using a general testing approach, our highly trained quality assurance technicians will work with you to customize a testing program based on your specific needs; reducing your costs while more effectively identifying deficiencies in product quality and regulatory compliance. And we don't stop there. We'll also keep you aware of the latest changes in global standards and regulations, ensuring that you satisfy the requirements of any and all government authorities.

ACCURATE, CREDIBLE TEST RESULTS

Our exclusive, global partnership with NSF International will ensure that your testing results have unmatched dependability. NSF is an independent, public health and safety organization that writes national consensus standards and is also an accredited testing and certification body. NSF uses detailed research lab procedures, not production lab procedures, and an unmatched staff of technical experts, resulting in more accurate, repeatable results.

QUICK, EFFECTIVE ISSUE ANALYSIS AND REMEDIATION

We take a comprehensive approach to your success, both now and in the future. So if a failure is detected during testing, we don't just report it to you, we help you remedy it. We'll perform a root cause analysis on failures and provide your suppliers with permanent solutions, reducing the risk of costly delays in the future.

“Laboratory testing is becoming increasingly complex, we look forward to this comprehensive solution from Impactiva”.

**Karl-Heinz Lauterbach,
Managing Director,
Marc O'Polo Shoes GmbH**
