

IMPACTIVA CUSTOMER SUPPLY CHAIN INFORMATION SYSTEM

FROM INEFFICIENCIES TO DATA ERRORS, POOR PROCESS MANAGEMENT CAN PUT YOUR GLOBAL SUPPLY CHAIN AT RISK

Waste destroys profits. Miscommunications of requirements, purchase order mistakes and lead-time delays: all can dramatically reduce the margins of factories, trading companies and brand owners. With costs continuing to rise each day, having access to real-time information and documentation is no longer a luxury, it's essential. At Impactiva, we can help. Our IT specialists will work with you to identify and implement a cloud-based customer supply chain information system that improves by up to 30% the accuracy and productivity of your internal staff, quality and speed of communications with suppliers and delivery lead-times.

WHY IS IMPACTIVA DIFFERENT?

REAL-TIME, COST-SAVING ACCESS TO INFORMATION

Information is power. With an Impactiva customer supply chain information system, each member of your supply chain will have immediate, Web-based access to key documents and instructions, such as product specifications, purchase orders, and shipping documents. The resulting collaboration with suppliers will dramatically improve material, production and quality management, freight consolidation, lowering costs, and improving order fulfillment accuracy by 10–30 percent.

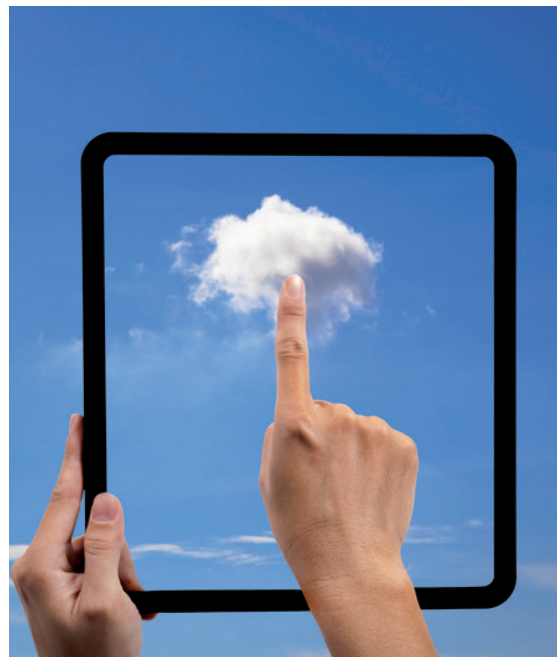

SUSTAINED SUPPLIER EVALUATION INCLUDING TESTING COMPLIANCE

In addition to better communication and management, your system will provide advanced analytics and report automation, allowing you to professionally evaluate your suppliers. And that's not all. You will also have greater visibility into the timely management of your physical property and restricted substance testing programs.

UNPARALLELLED INDUSTRY AND VENDOR INSIGHT

As the world's leading quality assurance company in the leather, footwear and apparel industries, Impactiva's manufacturing expertise will be invaluable in helping you customize and implement the right system for your supply chain. We understand your products and the processes required to manufacture them, allowing us to ensure maximum functionality in seven key system areas: purchase order, materials, lab testing, product specifications, shipping, quality, and production status.

Impactiva's customer supply chain information systems provide greater than 10 percent improvements in production lead-times, order fill rate, and order fill accuracy.
