

# IMPACTIVA MANUFACTURING EXCELLENCE SYSTEM

## FROM LOW PRODUCTIVITY TO LONG LEAD-TIMES, WASTE AND POOR PERFORMANCE CAN PUT YOUR GLOBAL SUPPLY CHAIN AT RISK

Waste and poor performance destroy profits. Excess labor, work-in-process inventory, lead-times, and development and manufacturing costs can dramatically reduce the margins of factories, trading companies and brand owners. With costs continuing to rise each day, improving your factories is no longer an option, it's essential. At Impactiva, we can help. Our specialists will work with you to design, establish and implement a Manufacturing Excellence System that generates higher quality output, with the same or less costs, by improving performance in six key areas: leadership, quality, manufacturing, delivery, cost, and research and development.

## WHY IS IMPACTIVA DIFFERENT?

### TAILORED PROGRAM TO SATISFY STRATEGIC OPERATING GOALS

Our approach is comprehensive and customized. Following initial meetings to understand your strategic operating goals, we'll gather data, perform detailed assessments, and identify opportunities for improvement in each key area. Ultimately, we'll help you transform your factories into world-class organizations highlighted by a quality-first culture, sustained manufacturing excellence, leading speed to market, cost reductions, and engineering Right from the start™.

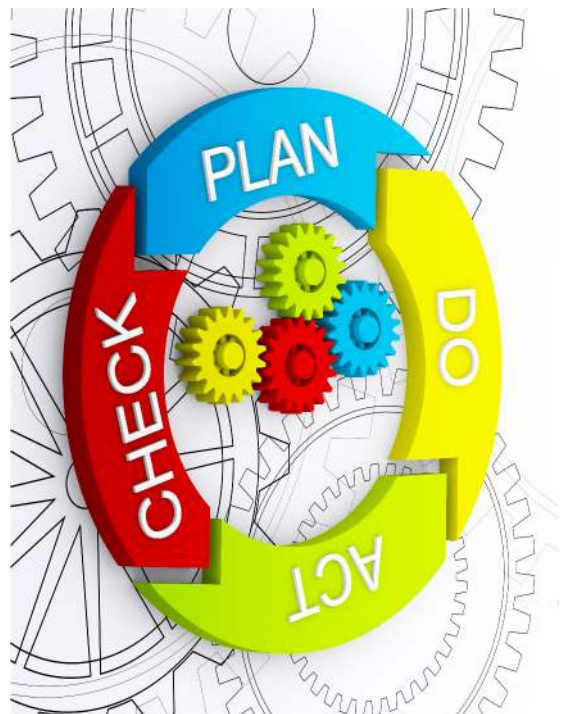

### SIGNIFICANT, SUSTAINABLE IMPROVEMENTS

A Manufacturing Excellence System is only useful if it can be sustained. That's why we'll provide extensive training and coaching of leadership and key personnel and establish individual, department, and company goals so that all team members fully understand their roles and responsibilities. These actions, combined with our development of standardized quality and process documents, will ensure a culture of continuous improvement with ongoing efficiency, consistency, and accountability for many years.

### INDUSTRY-LEADING SPECIALISTS

Your highly trained Impactiva Team will include a wide range of consultants, including specialists in Lean, change leadership, cost engineering, and quality assurance. But that's not what makes them different. As employees of Impactiva, the world's leading quality assurance provider to the leather, footwear, apparel, and other lifestyle industries, they'll also provide the industry insight needed to maximize efficiencies and more quickly achieve your strategic operating goals.

Impactiva's Manufacturing Excellence System will provide sustained optimization of your manufacturing supply chain by eliminating waste and improving output, allowing you to achieve excellence in quality, cost, delivery, flexibility, and innovation.
